Kochi University of Technology (KUT) started Special Scholarship Program (SSP) in 2003 to support the advanced research of the university by enlisting the help of highly capable doctoral students especially from foreign countries. The Chinese branch and Thai branch of KUT alumni were established in 2006 when the first SSP students graduated. After one year later, the Chinese branch held the first International Symposium on Frontier Technology (ISFT) in Shenyang. At present, around 150 SSP graduates are playing active roles in various academic fields in many countries, and the network has most certainly become larger and larger. ISFT is held every two years to provide a place for the exchange of innovative ideas and cutting-edge information among SSP graduates and many researchers from all around the world. In 2017, the Chinese branch, the Thai branch and KUT will jointly host the 6th symposium in KUT to celebrate the special occasion of the 20th anniversary of KUT as well as to offer the chance to explore international or interdisciplinary collaboration among participants.
