Kochi University of Technology (KUT) started Special Scholarship Program (SSP) in 2003 to support the advanced research of the university by enlisting the help of highly capable doctoral students especially from foreign countries. The Chinese branch and Thai branch of KUT alumni were established in 2006 when the first SSP students graduated. After one year later, the Chinese branch held the first International Symposium on Frontier Technology (ISFT) in Shenyang. At present, around 170 SSP graduates are playing active roles in various academic fields in many countries, and the network has most become in greater society. In 2019, the 7th symposium will be held in Thailand, for the first time, to offer the chance to explore international or interdisciplinary collaboration among SSP graduates and researchers.
